Feedback 1

Hey,

You should add last names and GUID of all members. Concept isn't detailed or unique and is basically a general description of the task we were given, not what your project hopes to accomplish making the concept vague overall. Features should be in the concept section or be the whole concept section as the previous slide seemed unnecessary. Features are defined well though, and are easy to understand. Wireframe is simple and easy on the eyes, weird that some parts seem hand drawn though. User personas are highly detailed and really well written, along with their scenarios.

Perfect 5/7.

Best regards,
Team Candy Corn

Feedback 2

Hi,

We are team Hot Lunch here's our evaluation on your project documentation. Hope you find it helpful!

**** APPROVED ****

- Cool personas, good job!
- We liked the description of the key features

**** NEEDS IMPROVEMENT ****

- The wire-frame is too simple
- The elevation bar doesn't have metrics - introduce numbers/colours?
- Label the metrics you've defined like speed, distance, etc.
- Align/Center the right items of the page

Best,
Team Hot Lunch
